DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-6 and 8-15 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record either taken singularly or in combination fails to disclose a system for augmenting cooling between a portable computer and a cooling station wherein the cooling station has a first fluid circuit having a fluid reservoir, a circulating pump, and two first couplers capable of coupling to two second couplers associated with the computer equipped with a first cooling circuit so that upon the docking, the fluid is capable of being circulated in the first and second cooling fluid circuits; an interface connector and a controller (claims 1, 6 and 11) and the computer is characterized by having a clamshell, a key board portion pivotally coupled together (claim 10). The prior art discloses the portable computer and the cooling station thermally connected by heat sink, heat pipe or a fluidly cooled station to dissipate heat from the portable computer by conduction. The matter of having couplers between the computer and cooling station so that a fluid is circulated between a first and second fluid circuit of the computer and the station is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3743

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patel et al (US 20050122678A1) discloses a docking station cooling system including a liquid filled hollow structure.
